Career Objective

Electronics and Communication Engineering student (2027 batch) with a strong foundation in **Data Structures & Algorithms, Object-Oriented Programming, Full-Stack Software Development, Cloud Computing (AWS), and Artificial Intelligence / Machine Learning**. Experienced in designing, coding, and deploying full-stack web applications and backend systems. Seeking to contribute as a Specialist Programmer / Digital Specialist Engineer Trainee at Infosys, applying strong programming fundamentals and problem-solving skills to build scalable, real-world software solutions.

Technical Skills

- **Programming Languages:** Java, Python, C, JavaScript
- **Core CS Fundamentals:** Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Computer Networks, Operating Systems Basics, Database Fundamentals
- **Full-Stack & Web Development:** Flask, REST APIs, Full-Stack Web Application Development, Backend Development, Frontend Development, Authentication & Session Management
- **Cloud & DevOps:** AWS (EC2, Server Hosting & Administration), Deployment, Continuous Updates, Linux Server Management, Git, GitHub, Version Control
- **AI/ML & Automation:** Large Language Model (LLM) Integration, Machine Learning Fundamentals, Natural Language Processing (NLP), Salesforce AI, Automation Anywhere (RPA)
- **Networking:** 5G Core Network Concepts, NS-3, 5G-LENA, Open5GS, Free5GC, Wireless Communication
- **Tools & Platforms:** VS Code, Linux, Git, Multisim, Cadence, AGI STK
- **Other Technical Exposure:** ROS2, SLAM, Embedded C, IoT, Robotics

Education

K L University, Vijayawada	2023 – 2027
B.Tech in Electronics and Communication Engineering	CGPA: 8.98/10
ACS PUC College, Dharwad	2021 – 2023
Pre-University Course (Science Stream)	CGPA: 8.21/10

Internships

- | | |
|-------------------------------|---------------------|
| Intern, IIITDM Kurnool | May 2026 – Jul 2026 |
|-------------------------------|---------------------|
- Built a full-stack, browser-based web dashboard for real-time 5G core network administration using Open5GS, and an AI-managed Network Operations Center by integrating a trained LLM for natural-language control and live telemetry.
 - Worked on 5G-LENA/NS-3 based simulation and performance evaluation of 5G NR, NR-V2X, and NR-U networks, applying algorithmic analysis to key network metrics; managed and maintained institutional websites end-to-end.
 - Delivered a technical practical session to an audience of around 30 lecturers, receiving strong recognition for the session.
- | | |
|---|---------------------|
| Java Development Intern, TechnoHacks Solutions Pvt. Ltd. | Jul 2025 – Aug 2025 |
|---|---------------------|
- Developed and optimized Java-based applications, improving code efficiency, readability, and debugging processes.
 - Applied Data Structures and Algorithms concepts to design and implement solutions for real-world programming problems.

Software, Full-Stack & AI/Cloud Projects

- | | |
|---|--|
| Open5GS Web Dashboard & Management Interface | <i>Python, JavaScript, Full-Stack, REST APIs</i> |
|---|--|
- Built a real-time, browser-based Network Operations Center dashboard for 5G core network administration and control.
 - Developed a full-stack management interface on top of Open5GS enabling live monitoring and control of core network functions.
- | | |
|--|---|
| Autonomous 5G Network Operations Center | <i>Python, LLM Integration, AI Automation</i> |
|--|---|
- Designed an AI-managed private 5G core system with live telemetry and natural-language control capabilities.
 - Integrated a trained LLM into the dashboard, enabling intelligent monitoring and conversational control of the network.
- | | |
|--|-----------------------------------|
| WorkIt TrackIt – Gym Management Web Application | <i>Full-Stack, AWS, Databases</i> |
|--|-----------------------------------|
- Built a full-stack gym tracking web application supporting workout logging, progress tracking, and member management.
 - Deployed and hosted on AWS, independently handling backend server configuration, maintenance, and updates.
- | | | |
|--|--|--------|
| Life OS – Personal Productivity Web Application | <i>Full-Stack, Authentication, Data Management</i> | GitHub |
|--|--|--------|
- Developed a full-stack web application for task, habit, and finance tracking with an analytics dashboard.
 - Implemented user authentication, data management, and a responsive UI to improve overall user productivity.
- | | |
|---|---|
| Cloud-Hosted Full-Stack Websites | <i>AWS, Backend Development, DevOps</i> |
|---|---|
- Independently built, hosted, and maintained multiple full-stack websites and web applications on AWS servers, handling backend development, Linux server administration, and continuous deployment.
- | | |
|--|--|
| Selected Networking & Robotics Projects | |
|--|--|
- | | |
|---|-------------------------------------|
| 5G-LENA Based Simulation of 5G NR, NR-V2X and NR-U Networks Using NS-3 | <i>C++, NS-3, Computer Networks</i> |
|---|-------------------------------------|
- Simulated and evaluated performance (throughput, latency, reliability) of 5G NR, NR-V2X, and NR-U networks using the 5G-LENA module in NS-3 through algorithmic analysis.
- | | |
|--|---|
| Autonomous Mobile Robot with SLAM-Based Mapping and Nav2 Navigation | <i>Python, ROS2, Path-Planning Algorithms</i> |
|--|---|
- Designed and implemented an autonomous mobile robot with SLAM-based mapping and Nav2-based real-time path planning and obstacle avoidance using graph-search algorithms.

Certifications

- Automation Anywhere Certified Advanced Automation Professional Certification
- Salesforce Certified AI Associate
- AI for Business – Columbia University — Prompt Engineering and Programming with OpenAI – Columbia University
- NVIDIA Deep Learning Institute (DLI) – Image Segmentation — Accenture Software Engineering Simulation – Forage
